Summary

Results-driven ERP Specialist with experience in enterprise data management, SAP ERP support, and business process operations. Specialized in ensuring data accuracy, integrity, and consistency throughout the ERP lifecycle by validating, cleansing, and preparing large volumes of business data for SAP migration. Proven ability to manage high-volume workloads, complete multi-period backlogs within deadlines, and provide effective end-user support while maintaining operational efficiency and data quality.
Alongside my ERP career, I work as a part-time Mobile and Web Application Developer, building business systems using Flutter, PHP, Firebase, MySQL and modern web technologies. Passionate about process improvement, automation, and developing digital solutions that increase operational efficiency.

WORK EXPERIENCE

Alsons Aquaculture Corporation — **SACI Compound, Maribulan, Alabel Sarangani Province**
ERP Specialist — *Sep 2025 - Present*

- Complete and process five periods of transaction backlogs within deadlines while maintaining data quality.
- Manage, validate, and maintain accurate business data to ensure data integrity and consistency.
- Prepare, cleanse, and upload migration data into SAP ERP with high accuracy.
- Monitor, verify, and resolve data discrepancies before SAP posting.
- Provide first-level SAP ERP support by assisting users with system and transaction-related issues.
- Collaborate with cross-functional teams to ensure accurate data processing and smooth business operations.
- Generate reports and maintain documentation to support ERP processes and data governance.
- Identify opportunities to improve data quality, process efficiency, and operational workflows.

Key Achievements

- Successfully completed the migration and upload of validated business data into SAP ERP while maintaining a high level of data integrity.
- Build specialized expertise in ERP migration, financial data integrity, and implementation
- Hands-on exposure to financial data extraction, mapping, cleanup, validation, and reconciliation
- Cleared and processed five periods of operational backlogs within required timelines without compromising data quality or accuracy.
- Contributed to a smooth ERP migration by ensuring accurate, complete, and reliable master and transactional data.
- Consistently delivered timely user support, minimizing operational disruptions and improving overall system usability.

Projects

TunaTrike — **General Santos City**
Fullstack Developer — *Oct 2024 - Dec 2024*

- Developed a fully functional ride-booking application that connects passengers with drivers in real time using Flutter
- (Dart), Firebase, and Google APIs
- Implemented core features such as user login and verification, estimated fare amount, driver ratings, and feedback
- Tested the app in alpha and beta phases with users and developers

User Access Request Form (UAR)

SACI Compound, Maribulan, Alabel Sarangani

Front-End Developer *Mar 2025 - May 2025*

- Initiated to grant specific users necessary permissions to access designated systems, tools, or resources
- Ensured compliance with internal IT policies and supported operational efficiency
- Implemented backend logic and data management using PHP and MySQL.
- Built a secure internal web-based request system to manage employee access to corporate systems and resources.
- Developed responsive front-end using Bootstrap, HTML5, CSS3, and JavaScript.

GODTRASCO - E-ticket Mobile Application

Glan Sarangani Province

Fullstack Developer *Feb 2026 - Mar 2026*

- Developed a cross-platform e-ticketing application with a web-based administration portal using Flutter and Firebase. The system enables digital ticket booking, real-time ticket validation, user management, and administrative monitoring, providing an efficient and paperless ticketing solution.

Franz Laundry Hub - E-ticket Mobile Application

Glan Sarangani Province

Fullstack Developer *Mar 2026 - Apr 2026*

- Developed a mobile laundry management application with a web-based administration portal using Flutter and Firebase. The system streamlines customer bookings, order tracking, service management, and real-time status updates, allowing administrators to efficiently manage daily laundry operations.

CPGT - Cunanan Printing and General Trading LLC

UAE Dubai

Fullstack Developer *Mar 2026 - Apr 2026*

- Developed a responsive WordPress website using the Elementor plugin for a printing business based in Dubai, showcasing the company's products, services, and customer testimonials. Designed to strengthen the business's online presence, improve customer engagement, and support business growth through a professional and user-friendly website.
